VULCAN, ALBERTA

TOWN COUNCIL

Aldermen Have Speech With The Policemen

The mayor and all members of the Vulcan council were in session on April 17. Constable Davies, of the Alberta P. P., and Constable Watt, the town man, were also there. It was a get-together conference of municipal and police official, not as a result of any crime wave or unusual disorder, but rather an exchange of views of what they might expect of each other in the matter of law enforcement.

A complaint was read from the Canadian Pacific Railway Company relative to the litter and straw on their right-of-way through teams being tied up there and the space used as a feeding ground. The town man was instructed to clean this up and the secretary to notify the company that in future they would have to take care of their own premises.

The lots immediately north of the office of the secretary-treasurer and occupied by the Municipal District of Royal were also ordered to be cleaned of the straw and other litter, and kept clean.

The practice of boys riding on the sidewalks on their bicycles was brought up for discussion. It was ordered that a notice regarding this be published in the local newspaper and afterwards offenders in this direction be proceeded against in the event of further infraction.

The clean-up of the town was also under discussion. It was decided that the citizens be notified to have their lots and backyards cleaned up by May 5.

The form of taxation for the current year was up for discussion and it was arranged that a special meeting be called to discuss this matter further on the last Monday of the month.

Odd Fellows' Church Service

All Odd Fellows, Rebekahs and members of the Encampment, are requested to attend service at the Union Church, Sunday, April 29th at 11 a.m. Parade will form at the I. O. O. F. Hall at 10:30 a.m. Badges will be worn.

VULCAN IN IT

District Superintendent Over Assists in Radio Record

Friday's daily papers, under big display heads, reported the establishment of a radio record, in which a radio message was relayed across the continent by Canadian amateurs. In this Mr. A. J. Ober, of Vulcan, district superintendent, had a part.

The best record was the relaying of a message from the station operated by O. Ball, Montreal, to the station operated by W. F. Reeves, Duncan, Vancouver Island, and return, in twenty-three minutes. The message from station 5 CT, Mr. W. F. Reeves, of Duncan, B.C., received at station 4DQ, Mr. A. J. Ober, of Vulcan, at 10 p.m.; relayed to station 9 EX, Mr. Maynard, of Moose, Sask., at 10:10 p.m.; relayed to station 3 NI, at Toronto, at 10:15; relayed to station 2 BG, in Quebec, 10:23.

TENNIS CLUB

Local Organization Has Cash Balance From Last Season

The annual meeting of the Vulcan Tennis Club was held on the 23rd April at 7:15 p.m. at the Bank of Commerce chambers.

The minutes of the previous meeting were read and adopted.

Financial statement was then read, as follows: Receipts for the year \$72.50, balance forward from previous season \$95.10. Total expenditures for season \$62.49, leaving a balance of \$105.11 brought forward. Above was adopted as read and carried.

Election of officers: President, R. Drummond; vice-president, Miss M. Wylie; executive, A. J. Ober, J. Wolfe, A. J. E. Gibson, Miss Ethel Hoge and Mrs. Galliker.

On motion of Mr. Wolfe and seconded by Mr. Ober, it was decided to move the courts from their present location to the Fair Grounds. The executive was instructed to have the work done immediately.

The fees for the season were set at \$2.50 per member and \$1 for school children, the latter to have special hours to play, to be decided upon by the committee.

THE BOYS

Organization of Young Lads Attend Church

Rev. Mr. Brunton in speaking to the "Beavers" on Sunday morning, urged the boys not to be always thinking of their own future, but the future of their town and community. Others had worked and made sacrifices for them before they were born. They came to homes and schools already built, to churches and all the advantages of a civilized and settled community, that could not have existed without the labor and sacrifices of those who had gone before them. It is their duty to better conditions and pass on an even higher community life to those who would come after them.

"To you we fung the torch. Be yeurs to hold it high. If ye break faith with us who die We shall not sleep though Poppies grow in Flanders field."

LOCAL ITEMS

Your neighbors want to know if you are going to shut in your hens before the gardens are made? "At 20 years of age she will reigns, at 30 the wit, and at 40 the judgment,"—and when you're dead, you will again reigns supreme, for other people.

A mistake was made in announcing the date that Miss McIntyre would give her demonstration-lecture for the Vulcan Women's Institute, the date being May 25th instead of April 25th.

Mr. N. S. Campbell advertised in the last issue of The Advocate for a parcel that he had lost. In less than two days after the issue of the paper the parcel was recovered. This is mentioned to suggest the value of our classified ads.

Radio fans in Vulcan and vicinity listened in on the concert broadcasted by The Herald on Friday night, and rendered by Prof. Jacketta's artists, and Bandmaster Ober, who is an authority on music as well as wireless, assures The Advocate of the exceptional excellence of the music. These are the artists who will appear in concert in Vulcan this Friday evening.

MORE OF IT

Old Country Papers Print Report of Vulcan Event

The Advocate has just received from Robert J. C. Stead, Director of Publicity for the Canadian Government, a copy of The Sheffield Independent containing an article in reference to the big team and wheat delivery record made by Mr. Ralph Morehouse, the man who has made Vulcan famous. With the copy of the paper came this note from Mr. Stead: "I think you will be interested in the enclosed Canadian supplement of The Sheffield Independent, as on page eleven you will find an article entitled 'How They Do Things at Vulcan.' The same article has run through similar supplements in twenty-five other papers published in Great Britain."

The article is an exact copy, and the pictures are the same, as in the report in The Advocate which detailed an event that has become great the world over and gave start to a line of real publicity that has not yet reached a limit. We take it as a real compliment to The Advocate that this article has been accepted by the Dominion publicity director and printed without change by so many papers in the Old Country, and it is our pleasure and satisfaction if this modest little weekly has been the medium through which any good or advantage has come to our country, our province, or our town.

BASEBALL

Vulcan Club Re-Organizes and Makes Start

There will be a baseball team in Vulcan this year, and a good one if calculations carry. It was so decided at a splendid meeting held in the Opera House on Tuesday night. Vulcan would not be Vulcan at all without a ball team, and the enthusiasts have determined that, with the support that is promised and expected from our citizens, the town will have a team that will give credit to the name of Vulcan.

The following officers were elected: President, D. C. Jones; vice-president, D. Cunningham; secretary-treasurer, Howard Marcellus; management committee, Roy Ferguson, Ernie Russell, D. Berringer, Frank Keiver; finance committee, D. Cunningham, Dr. Wark, Harry Nelson.

The meeting provided a full discussion of baseball in Vulcan from every angle, and the result of this is the prospect of a splendid season. The working out of some of the details will depend upon the success of the canvas for financial and other support that will at once be made by the committee. Work on the grounds will be undertaken without delay, and the opportunity to boost is open to everybody.

LOCAL ITEMS

Miss Ingram, of Calgary, was a week-end visitor in Vulcan, the guest of Miss Shaw.

Mr. Robert Brown is spending a few days in Vulcan, a guest at the house of his sister, Mrs. Geo. McTaggart. Mr. Brown has just completed a term at the Olds School of Agriculture.

There is a method of marketing eggs; the detail of which is not all known to the newspaper man, but we are informed that a report is made by experts on all shipments, and rejected eggs are classified as stall, cracked, and other defects, but on two separate shipments recently made from Vulcan, reports classified some eggs as "boiled." This is a new one, and suggests at least the necessity of a little more care in the accumulation of eggs for delivery and sale to the local merchant.

Mr. R. J. Mond's has for some weeks been a resident of Vulcan, and last week in this journal, made his announcement as a Vulcan business man, his line being I. H. C. machinery and other implements. His location in the former grocery store just this way from the depot, which has been so appointed as to facilitate the handling of his wares and repairs, and if the splendid arrangements made are an indication of his business methods, Vulcan will be pleased to welcome a new citizen and a live business man.

Mrs. J. N. Johnston brought to town the other day a silver watch that in some ways is like unto old "King Tut," at least it has been buried for some time and has recently been unearthed. This watch, which was lost in a field on the farm just seven years ago by a hired man named John Michie, was some few days ago found by a hired man named Jim Johnston. The land in this field has not missed a single year of cultivation and crop in the whole seven, and though it may have been turned over several times the watch did not show its face until now. It is of the old English lever type, and for the length of time that it has been in the field it is well preserved, and Mrs. Johnston says it ticked a few ticks when given a shake just after recovery.

LOCAL ITEMS

"Trees are to a town as trimming to a dress."

When the forest is not on fire it is useful for Canada to pay her war debts.

Norman Young, merchant at Ensign was a busy business visitor to Vulcan on Friday.

Mr. and Mrs. L. W. Greenlee left Vulcan on Monday night for Lacombe, where they will reside.

School Inspector Liggett was in Vulcan this week, and is making inspections in the district.

An oil refinery will be built at Lethbridge. It looks as if oil men are very hopeful of good results.

The Odd Fellows, Rebekahs and members of the Encampment will attend service at the Union Church on Sunday morning. Rev. Mr. Brunton will preach. Members of the order will assemble for the parade at the hall at 10:30 a.m.

A Missouri editor will publish no more obituary notices of people who while living did not subscribe to his paper. He says: "People who do not take their home paper are dead, anyway—and their mere passing away, is of no news value."

Last week we omitted to mention flowers and the flower show. We are informed that there has been no great enrolment of membership in the horticultural society, but shortly the appearance of flowers will suggest to us the necessity of getting busy.

On May 4th, the Vulcan Women's Institute will hold their regular meeting at the home of Mrs. Schenck, and all ladies are invited to attend. The report of the district conference will be given at this meeting. There will also be entertainment.

Mr. Harry Wenger, local manager with the Imperial Oil Company, called at this office with a copy of a publication issued by his company. It contained an article in reference to Ralph Morehouse and his big team and record wheat delivery, and the accompanying photos of the feat were as good as any we have yet seen.

Mr. Roy Shaw left Monday night for St. Gregory, in Saskatchewan, to work on elevator construction for the Home Grain Company, and later will be given the management of an elevator. This success of our young townsman is a satisfaction to many friends. Roy played a good first base on our ball team and was popular with the fans and players.

Municipal authorities are anticipating the arrival of some eleven hundred trees, to be set out in the exhibition park. From these it is intended to develop stock sufficient to beautify the park and supply the local demand for trees on the streets and on private premises. The tree policy of the council looks good, and may the best of calculations be realized.

The valuable brooch, owned by Mrs. Mitchell and advertised as lost in the last issue of The Advocate, has been recovered, found by Mrs. Mitchell herself on the road near her home, where she had changed from one auto to another, and where the brooch had escaped destruction by the many passing vehicles for just a week. Though the advt. did not recover the article, it could not be denied that there is some good luck in advertising.

The suggestion made by The Advocate as to the organization of a basketball team has been enthusiastically received by the young girls, and some who are not so young, and the prospects are that before long Vulcan will have a ladies' basketball team that will make the best of them step along. We have in town one player with expert knowledge of the game who is willing to instruct the players. Let's go.

Bing!—and in succession a number of bings. Bullets from a twenty-two, aimed at a tin can on a post, came whizzing close by one of our citizens and hit his house and the chicken pen. Investigation proved that the small rifle was being used in turn by a number of lads who were wide of the tin can but very close to serious trouble. Of course, there was no intention of harm, but fire arms in the hands of young lads, to say the least, are dangerous.

Mr. Buck is back to business, or more correctly, he was down for a day or so, but has since been spending a few days with Dr. Bedingfield and other friends in High River. He bears the evidence of his illness, but his many friends are pleased that he has so far recovered as to be able to be about. Dr. and Mrs. Bedingfield were over at the week-end and he went back with them.

This is a good local story, and it is true. The Sunday school teacher was discussing the subject of faith with a class of boys, and to illustrate said, "Now, if your father on Monday promised to give you a half dollar on the following Saturday, you would readily believe that you would get it—that would be faith." One of the observing and attentive listeners quickly answered, "Say, teacher, them days are gone forever."

LOCAL ITEMS

Miss Vera Vanskiver has returned from a visit of a week in Calgary.

A heavy flow of gas was struck in Southern Alberta in the Thompson Oil Co.'s well.

Speaker McPherson and D. H. Galbraith, M.L.A., were in Vulcan as soon after the session of the Legislature as possible, and immediately went back to the land.

J. A. Tulley was the distinguished visitor at a meeting of the Vulcan Encampment. Mr. Tulley is a Past Grand Master of the I. O. O. F. and is a director of the work in connection with the Odd Fellows' Relief Fund.

Oil and other necessities for the improvement of the golf course are to be made. Some alterations are to be made that will make the course to better meet the requirements of the club members, who are every day becoming greater and greater in numbers.

Three fine new cars have made their appearance in Vulcan during the past week or two, and they are the property of Messrs. A. O. Craig, L. H. Stack and F. L. Simington. All three are McLaughlins, and they are beauties. A. W. Kelly of High River made the sales.

A frame building, on wheels, and drawn by a team of several horses, came moving into town the other day. It was the old office building of the Beaver Lumber Co. at Kirkcaldy, and we understand that alterations and additions will be made to convert it into a comfortable dwelling house.

The Girls' Club, an organization that has long existed in Vulcan, has been disbanded. The club ended even, with no debts and no money. This organization has in times past accomplished many good things and was a means of profit in several ways to its members and the community. Even good things sometimes pass away.

On Tuesday of last week, Miss Marion Flood was nine years old, and members of her day school class celebrated the event with her at the home of her parents, Mr. and Mrs. A. J. Flood. It was a jolly time, with all the features of a real birthday party. The Advocate adds its good wishes to those extended to Marion by her many young friends on that day.

The Alberta Gazette of April 14 officially records the appointment of Percy Burgess Discher, of Vulcan, issuer of marriage licenses. It so happened that the first license issued by him was that procured for the marriage of Mr. and Mrs. Prentice, who marriage has had much mention because of the unique circumstances and features of the event.

Rus Rolson, the local picture man, spent Thursday in Calgary, making the necessary arrangements to continue giving Vulcan good pictures. In this connection we might mention that we have noted by advertising in the city dailies that the Regent theatre in Calgary is this week making a big feature of "Monte Cristo," a picture that was presented in Vulcan last week. The Regent is one of the best theatres in the city, and we are prompted to wonder if the excellence of the pictures presented in Vulcan are fully appreciated by our people.

Many papers have printed The Advocate account of the unique wedding which took place recently in Vulcan, and many others have commented upon the event. It is true that there are not many marriages in which the principals are more than seventy years of age, and the attendants to the bride and groom are members of the one family to the fourth generation. Mr. and Mrs. Prentice, who are the subjects of this reference, have written to friends from California to report their safe arrival and a very happy start on their new home life in that state.

On Monday morning of last week, Mr. George Ecker, manager of the Pioneer Elevator Company, discovered that the glass in the many windows of the elevator had all been broken. It did not take long to find out who had done the breaking, and it proved to be a number of our own home town lads who, when approached on the subject, readily owned up, and without any prevarication. The sound of smashing glass has long been a delight to the lad that has in him any of the pep that father used to have, and parents can imagine what a grand and glorious time the boys had when the gang made the attack on that elevator. But the serious time comes later, and since the lads have been chippin' in to pay for the damage, the total of which amounts to a considerable sum. The candor of the boys in admitting the offence, and perhaps the good nature of the elevator manager, who it is suspected had memories of his boyhood days, might have had much to do in keeping the lads out of the hands of the policeman. No doubt they will appreciate the generous treatment and permit it to govern their future performances. Let it be suggested that the boys expend their energy in playing ball rather than in throwing stones.

Don't Lose Your Head

Just because crops have been short and business is a bit slow. There probably never was a time in the history of your business when a stimulus was more needed than just right now.

Don't think you are economizing or cutting down your expenses by not advertising. There is some business to be done each day, and the buyer is looking for the place where he can get the most for his dollar.

The mail order house wants his dollar also. Are you going to let it go out of town without making an effort to prevent it?

The Vulcan Advocate

An Independent Weekly Newspaper issued every Wednesday afternoon at the office of publication, Vulcan, Alberta. Subscription price per year, in Canada, \$2.00; United States and other countries, \$2.50. Advertising rates will be furnished on request.

THE VULCAN ADVOCATE

VULCAN, ALBERTA

A FUTURE FOR GAS IN ALBERTA

That gas has in it a great future, as an asset in the province in the feasibility of its being piped for consumption in Eastern Canada is not altogether a dream of exaggerated imagination. The National Petroleum News considers the project feasible according to engineering data. Alberta, it says, has a two-mile dead line strip entirely around it, over which no pipe line carrying gas can be laid. Alberta probably has more gas than any similar area in the world. At this time the Calgary Gas Co. is not supplying the city of Calgary with sufficient gas, according to its newspapers. The gas company made a trade for gas from the Medicine Hat district, but for some reason that deal has been blocked. The Calgary refinery being erected by the Imperial Oil Ltd. (the Standard of Canada) at a cost of \$2,500,000, when completed, will certainly use gas instead of \$3 oil under its stills. The Imperial has five large gas wells in the Wainwright district east of Edmonton. If it pipes gas to Calgary for its own use, a distance of about 140 miles, it will probably supply Calgary with the shortage mentioned above. In that event, eastern Canadian capitalists assert that an effort will be made to have the two-mile dead-line strip abrogated or declared unconstitutional, so that the gas now available in southeast Alberta can be piped through the provinces and towns all the way to Toronto. Engineering data not only show the project feasible, but show the population of each township on both sides of the pipe line for a distance of 24 miles, which, owing to the long cold seasons would require more than two big trunk lines to supply fuel gas.—Lethbridge Herald.

ALBERTA'S OIL RESOURCES

While drilling operations conducted in the potential petroleum areas of Western Canada have not been attended so far by any marked success, operators are by no means discouraged, and present indications point to a prosecution of the search throughout the coming season, with as much diligence as ever. While Imperial Oil, Limited, has been the leading operator, smaller groups and syndicates in increasing number are taking a hand in this pioneer work. On the prospects of the Southern Alberta field, M. S. Wolfe & Co. have the following to say in their current market letter:

The importance of the Alberta oil fields is growing daily from a geological standpoint. A geologist who has made a thorough study of the southern Alberta district states as follows: "One point grows increasingly clear. Far from facing world oil exhaustion, the oil industry is merely on the threshold of a glorious future." In that future Canada seems destined to play a conspicuous part, according to the same source. A bulletin issued by a business bureau recently said: "The attention of oil men the world over is being centred on the Alberta field. The American oil fields have pushed steadily northward through Wyoming and Montana, and the Imperial Oil Company, on the advice of its geologists, not only has an extensive drilling program under way near the international boundary but is planning to increase the scope of its operations. In fact, it is following the famous rock formation of Colorado, Wyoming and Montana along the whole length as it extends to the international line to the Arctic zone. Oil has been found in this formation in the far north. It has been found immediately south of the boundary. While the company is tapping at intermediate points all along the formation, the most energy is being shown in the boundary country."

One reason why the session at Edmonton has been so unduly stretched out is possibly the desire of the members to show that they are worth the amount of the indemnity paid them in the arduous and long hours occasioned.

PRESS COMMENTS

Bassano Mail: Garland's Lamentations in the federal parliament at Ottawa contain much truth, we regret to say. Whatever may be the storm of criticism about the lack of diplomacy in making the renouveau member for Bow River made, they cannot be entirely disproven. The western farmer is receiving too little for his produce and paying too much for his requirements. Therein lies the crux of the economic dilemma in which the west is placed. The railway companies, grain brokers, elevator companies, insurance companies, lake shippers and ocean shippers, all have to be assured of a substantial profit. These companies contend they are entitled to a percentage above their operating cost. That the original producer may be entitled to the same privilege does not seem to enter their heads. The manufacturing companies who supply the farmers with the necessities of life and of farm operation work on a like basis of cost price plus a percentage of profit, and only too often the tariff is included in their "cost price." The producer is the man who "holds the sack" for all this. The result has been that, while the west raises the greatest crop in its history, prosperity is absent. They are "killing the goose that laid the golden egg."

Albertan: The revelation at Ottawa that the Canadian National Marine, which was organized to protect the interests of the Canadian people, by the Canadian government, at a cost of \$75,000,000, had joined the combination of the exploiters of the Canadian people, has caused consternation and very great annoyance. It would be very much the same as if the government had joined with some new form of extortioners who were living out of excessive profits from the Canadian people. We spend money on the one hand to provide a steamship service to save us from the exploiters and then find that the service itself has become the cornerstone of the exploitation. The manner of exploitation is plain enough. Here is one instance. When there was no cattle trade between Canada and Great Britain, due to the embargo on British cattle, the ocean rate on Canadian cattle was \$15. But when trade promised to be worth while due to the removal of the embargo, the rate jumped to \$22.50. And instead of the Canadian merchant marine being there to give assistance, we find that it was right there with the financial exploiters of the country. It is a painful business.

Bassano Mail: W. M. Davidson, M.L.A. for a Calgary constituency, must be given credit for being a conscientious and courageous legislator. Of all the members in the provincial house he was the only one to take a step towards reducing the sessional indemnities. He introduced a bill to lower the indemnity from \$2,000 to \$1,500. It may be that the members of the provincial legislature are not overpaid at \$2,000 a year. But in the face of prevalent conditions that \$2,000 for two months attention to the affairs of state looks to be quite a sum. There are thousands of farmers and hundreds of business men who have worked zealously for a full year for considerably less. The majority of the people in Alberta feel that the expenses of government are too high. The political system planned for a population of a couple of million, is too heavy. Davidson's endeavor to reduce the indemnity will receive the approval of the people. He is a man whose feet are not made of clay.

Strathmore Standard: It is stated that some local people, while they preach buying at home, do not practice it. A number of local dealers last year participated in a campaign to encourage buying at home, but there is no use handing out advice to the other fellow unless you practice it yourself. Progressive dealers locally have cut their prices until now they are equal to, if not less, than the prices quoted by the city or department stores, as can be seen by comparing ad. prices, and they are getting their reward in increased business. But in some homes a superstition still obtains that a thing must be better because it comes from a distance. This is only a superstition as has been proved time and again, but it has its effect, and diverts a considerable amount of business. Surely the local

storekeeper himself should be immune from it, but apparently all of them are not, if reports we hear are true. The amount spent outside by local storekeepers for goods that can be purchased locally is small, but the principle is wrong, and bad feeling is created. We are not referring to the sale of printing, though we have known of cases of this happening, but to other articles sold locally. "Hang together, or you will hang separately," is both good advice and warning, and we hope that local people will encourage by example in the future.

Albertan: The Alberta legislature was in session for more than thirteen weeks, a much longer session than any precedent session, and did as little work that counts as any session ever held in Alberta. All that was done of any importance could have been easily compressed into four weeks without making the business so compressed at all uncomfortable.

AN OPINION OF IRVINE

The editor of Toronto Saturday Night is evidently a good judge of human nature as evidenced by the published opinion of Wm. Irvine, M.P. who represents Calgary at Ottawa. The reference was made in connection with the opposition of Irvine to a resolution brought up in the House in the interest of Canada periodicals. Saturday Night had the following: "Anything of a disparaging nature from Mr. Irvine, M.P. we always consider a decided compliment, and furthermore his opposition to the resolution introduced by Mr. Hocken M.P. in the interest of Canadian periodicals, will no doubt do much to enhance its value in the eyes of the average member of the House of Commons."

ARITHMETIC

He's teaching her Arithmetic. He said it was his mission; He kissed her once, he kissed her twice, And said, "Now, that's Addition." And as he added smack to smack In silent satisfaction, She sweetly gave him kisses back, And said, "Now, that's Subtraction." Then he kissed her and she kissed him, Without any explanation; Then both together smiled and said, "Now that's Multiplication." But had appeared upon the scene, And made a quick decision, He kicked the lad three blocks away And said, "That's long Division."

TO ALL Farmers of Vulcan District

We think it our duty to extend to you an invitation to come to our place of business and inspect for yourselves what is conceded by all users to be the most up-to-date and easiest operated Disc Plow on the market.

We might also state that our Drills have some exclusive features which we would be pleased to demonstrate.

It is not necessary to say anything about Weeds, as it is generally admitted that they would prosper in this country, if it were not for the Massey-Harris Spring Tooth Cultivator.

Phone 83

G. R. MARCELLUS, Manager.

Speaking of central heating plants how would it be to set fire to the coal mines in Alberta and pipe the heat all over Canada, it would save that much talked about excessive freight rate.

The lumber industry in this district continues active, about 50 per cent of the lumber shipments going to the United States. The demand has been good, although there is a slackening off of orders from the United States. The Prairie Provinces, however, have come into the market as buyers, and purchases have been heavier than for some months past.

Some of us are never satisfied, we came to this country and drove the Indians out, and then spend the rest of our time going round telling the world what a heck of a place Canada has become.

Machinery valued at \$40,000 has been bought by the Manitoba Woolen Mills, Limited, and on its installation manufacture will commence immediately. The main products will be blankets, wool and mackinaws. More than 300 Manitoba farmers are shareholders in the company, among them many prominent sheep raisers, who all have sent their wool crops to the mill.

CORN FOR SILAGE

The growing of silage crops has become more general in Western Canada during the past year or two, and one of the crops which is best suited to this purpose is corn. Over a large portion of the southern half of the three provinces corn can be grown profitably and, in any but very exceptional years will yield good crops of fodder. The average yield of the field lots of ensilage corn for the past ten years on the Experimental Farm at Indian Head is almost ten tons per acre. The variety which suits our conditions best, yield and maturity considered, is North Western Dent. Other varieties may be more adapted to some districts, but for silage purposes and average conditions this variety is very suitable, as it gives a fairly good yield of fodder and will usually be sufficiently mature to make a first-class quality of silage.

Ground which would otherwise be summerfallowed is entirely suitable for growing corn. The method of preparation which appears to give the best results is that of manuring and ploughing the ground the preceding fall. This gives an increased yield over spring ploughing. The spring growth of weeds can then be killed by cultivation before the corn is sown, and the harrowing just after the corn is up will also destroy a large number of weeds. The date of seeding which gives the best yields appears to be from the 20th to the end of May. Later seeding than this decreases the yield considerably. Various methods of planting the corn are followed, and all have their advocates. Check-rowing, or planting in hills three feet apart each way, permits of killing the weeds with very little necessity for hand labor, the ordinary two-row cultivator being able to destroy all but a small percentage of the weeds. A corn planter is necessary for the check-planting, and this is the most satisfactory implement to use even if the corn is planted in rows, as the amount of seed can be regulated accurately, and, in most cases, a substantial saving of seed can be made by its use. Three to five seeds per hill will be found sufficient. In sowing in drills, the drills should be three feet apart and the drill regulated to drop, as nearly as possible, one seed every six inches in the drill. It is desirable to harrow the corn as it is coming up as this does not injure it materially and will destroy thousands of small weeds. The number of cultivations required will depend largely on the weed growth, but usually three thorough cultivations will be sufficient to keep down the weeds and promote the best development of the crop. The silage will make the best quality of silage if allowed to grow until the kernels have reached the firm dough stage, or a little past the time when the ears are suitable for roasting. The best implement for cutting the crop is, of course, the corn binder, and, by a number of neighbours clubbing together, the individual cost of the machine can be greatly reduced.

OPERATING LARGE FARM

Active farming operations on 30,000 acres owned by the Noble Foundation, Ltd., will be started at once by the Canadian Corporation formed by the bond holders. Fred Hutchings, of the Alberta Pacific Grain company will be in charge. The financial collapse of the Noble Foundation, Ltd., was due primarily to the high cost of production and the low price for farm products. Last year as high as 33 bushels to the acre was raised. The bondholders hope to be able to cut up the immense tract to small holdings, giving very attractive terms. Mr. Noble, it is understood, will continue to operate the home farm at Nobleford.

We have yet to find a man who is good at football and grammar at the same time.

THE LIQUOR BALLOT

The following is the form for the ballot that will be submitted to the electors of the province some time during the coming summer or fall on the liquor issue, which is the burning question now before the people and on which the legislature spent practically the whole of last week. Mr. Brownlee had previously stated in the debate that it would be a sorry day for the province if the people voted in favor of any system which would allow the sale of beer in public places, and he made a determined stand to have the committee's report so far as question "D" is concerned amended so that the B. C. plan would be placed on the ballot instead of the Quebec plan.

A—Prohibition, meaning thereby a continuance and development of the present liquor legislation, that is, meaning the abolition of the sale of all liquors except for strictly medicinal, sacramental, manufacturing and scientific purposes.

B—Licensed Sale of Beer, meaning thereby the sale of beer in licensed hotels and other premises as provided in the proposed Temperance Act.

C—Government Sale of Beer, meaning thereby the sale of beer by authorized government vendors for consumption in private residences under government control and regulations, other liquors to be sold throughout by doctor's prescriptions for medicinal purposes.

D—Government Sale of All Liquors, meaning thereby the sale of all liquors by or through government vendors, beer to be consumed on licensed premises and in private residences; wines and spirits to be purchased in limited quantities, under permit issued by the government under government control and regulations.

Mrs. Nellie McClung, Liberal member for Edmonton, made a strong fight to have the Attorney General's amendment accepted, but when Sam Brown, Farmer member for High River, who was in the chair, as deputy speaker, put the amendment the volume of noises was so strong that he didn't consider a standing vote necessary.

GRADE FIELD SEEDS

The Seed Control Act, administered by the Department of Agriculture at Ottawa, is undergoing amendment at the present session of Parliament. The amending bill, after receiving the approval of the Agricultural Committee, has had its second reading in the House of Commons. The original act provides for the compulsory grading of only of timothy, alsike, red clover, and alfalfa. The grades of these seeds recognized are "Extra No. 1", "No. 1", "No. 2", "No. 3", and "Rejected". The amended act will extend compulsory grading to all kinds of grass and clover seed, flax, sorghum, millet, wheat, oats, barley, rye, corn, buckwheat, sunflower, field peas, field beans, and vetches. Provision is made for including seeds of other kinds of farm crops. The bill also provides for the optional grading for commerce of field roots and garden vegetable seeds. Farmers selling seed on their own premises will not be required to grade seed grain. Grass seed and clover seed, however, sold from the farm must have been officially tested and graded on the basis of a control sample.

FERNIE TO CALGARY

Daily papers of Alberta on April 16 contained the information that work would be commenced on the Fernie to Calgary railway. Mr. Franklin Crandell is a former citizen of High River and has been identified with this project for several years and we believe has been successful in getting British capital interested. The article reads: "Construction of the railroad from Sparwood, near Fernie, B.C., to Calgary by the Calgary and Fernie Railway Company, work on which was started in 1912, will be resumed this summer, according to announcement made by Franklin Crandell, one of the directors of the company, on Monday morning. It is the intention to construct 50 miles of the line this summer from Sparwood directly north to Mount Wilson. The cost of the construction of the road, together with the most of building a colliery at Mount Wilson will amount to approximately \$3,500,000, and the capital for this part of the road has been assured. The road has been surveyed for the entire distance of 157 miles and when the line is completed from Mount Wilson it will come into the city from the southwest."

THE WEATHER

For the past week the weather has been of a summerlike variety and at times was unusually hot for this time of the year. Clear and dry has been the rule and perfect conditions existing for work on the land. Seeding this week is very general and another planting very well accomplished. Week of this kind of weather will see on Monday and Tuesday of this week a heavy chinook was blowing which dried up things considerably, but the general opinions are expressed that the ground is in fair condition for a good start. More moisture will soon be needed however and we can stand considerable of it throughout the season. The trails generally in the district are in good motoring condition and farming activities are noticed in all directions.

Dr. Harold F. Messenger
CHIROPRACTOR

MUST REGISTER

The act to regulate the practice of chiropractic in Alberta passed the committee on Wednesday last without amendment and certificates will be issued to licensed chiropractors. In this connection Dr. A. F. Messenger of Calgary, a doctor of Chiropractic, and a brother of Dr. C. E. Messenger, prominent chiropractor of Calgary, who is very well known throughout the province will open an office in High River and Vulcan in order to look after many patients in the locality who cannot find the time to go to Calgary. Elsewhere an announcement appears in this paper giving particulars of office hours in High River.

After July 1, 1923, all chiropractors must be registered. A resident chiropractor, to qualify, must have been resident for at least one year before the passing of the act, and must hold a diploma showing at least two six-month courses in a resident school of chiropractic, must be of good moral character, and over the age of 21.

Persons entering the profession from places other than Alberta must show educational standards equal to Grade 71, of Alberta, a chiropractic diploma from a school where he has taken three six-month terms in residence with a total study time of 2,400 hours, of which he must have attended in 90 per cent. in Alberta subjects; must be over 21, and of good moral character. The applicant is to be examined to ascertain his general knowledge as a chiropractor, and in anatomy, physiology and history, chemistry, sanitary science and hygiene, general diagnosis, pathology and bacteriology, and the principles and practice of chiropractic treatment. A fee of \$50 is required for registration, and certificates are renewable annually. Provisions are made for disciplining members, and for withdrawing certificates from persons convicted of unprofessional conduct.

The registered chiropractor must describe himself as "doctor of chiropractic" or in some other way which will make it clear that he is not a doctor of medicine or surgery, and he shall use no drugs nor treat venereal or other communicable disease, perform any surgical operation, nor practice obstetrics or osteopathy.

ITEMS OF INTEREST

When the world doesn't appear to be running right, rest assured that you're not.

Flood conditions prevail in Brandon and Portage La Prairie and the inhabitants of the affected districts are apprehensive about the situation.

What looks like the biggest and best strike yet made in an Alberta oil field is reported from the Fabyan-Wainwright district, where on Saturday and Sunday the well of the British Petroleum Company blew in and developed a flow of 6,000,000 feet of gas. It is still flowing and the volume and density are increasing, the gas showing a high content of gasoline.

Speaking on the proposal to limit the exercise of judicial functions to judges under 70 years of age, the Attorney General of the British House of Commons said "the effect would be to deprive the higher courts and Privy Council of the assistance of judges of the greatest skill and experience"—and yet some business firms think 40 is a good age for a man to retire from their service.

Although figures are not yet available for coal production in Nova Scotia, the greatly increased tonnage from Alberta last year puts this province in the lead as the heaviest coal producing province in the Dominion. More coal was mined in Alberta in 1922 than in the year preceding by 38,549 tons. The figures for the year, which have been compiled by the provincial department of mines, were 5,975,744 tons, as compared with 5,937,195 tons in 1921.

The Blairmore Enterprise in commenting on the publication of a letter from Mr. J. W. McDonald of Macleod to Mr. McGillivray in connection with a recent shipment of liquor to the States which was confiscated by the Alberta police, says in an editorial note: "It is well to note that absolutely no attempt is made to retract any of the charges made by Mr. McDonald against the government or the department of attorney-general, in connection with the enforcement of the liquor act."

ANNOUNCEMENT

In answer to the many inquiries received at our Calgary Office we wish to announce that a branch office will be maintained in Vulcan during the months of May and June.

Commencing May 7th will be located at the Imperial Hotel.

The Secret of Cleopatra's Beauty

Palm and olive
oils—nothing else
—give nature's
green color to
Palmolive Soap.

However much she called upon cosmetics to increase her beauty, thorough cleansing was never neglected. Palm and olive oils were the basis of Cleopatra's elaborate toilet and the foundation of her lifelong beauty.

The luxury of Palmolive is a gift of modern science which ancient beauties never enjoyed. The palm and olive oils which they used are now blended in the finest facial soap the world has ever known.

In the mild, soothing, creamy lather of Palmolive you find an ideal cleanser. It is lotion-like in its action. It soothes while it cleanses. It is a real complexion beautifier.

The price places it within reach of all. You can afford to use it for every toilet purpose.

You can buy Palmolive Soap at all first-class dealers.

FIRE CASE

Citizen Fined for Violation of Town By-Law

At the Police Court last Saturday a case was heard that should interest all residents of the town. A citizen appeared to answer to a charge laid against him of burning rubbish in his yard. He pled guilty to the charge of violating the town by-law No. 16. The Justice presiding took into consideration this was the first time a conviction had been sought for violation of this fire by-law and fined the accused the minimum fine allowed by law without costs, but gave warning that future cases would be more severely dealt with. The by-law referred to is as follows: "It shall not be lawful for any person by himself or another to burn any rubbish in the Town of Vulcan except in an incinerator with a tight cover, and said incinerator while being used for the burning of rubbish shall be under the personal supervision of some person until the fire has burned down. No rubbish shall be burned in an incinerator after the hour of 4 p.m."

INTERESTING CASE

Local Man Not Within The Law on Two Counts

A case was heard at the Police Court last week which should be of interest. The A. P. P. was the informant. Oth Digner appeared to answer to two charges, the first for contravention of the Motor Vehicle act by operating a car upon the public highway without having first obtained a 1923 license. To this the accused pled guilty and was fined, a sum proportioned to the license of the car used and to the time from which a license should have been obtained.

To the second charge of having unlawfully pursued the calling of a peddler without first obtaining the necessary license for 1923 the accused entered a plea of not guilty, claiming that he was not a peddler in that he did not make delivery of the goods, simply took orders for them. On the definition of "peddler" as stated by the statute having been read to him, and having admitted having sold goods that clearly brought him under the statute, he changed his plea to that of guilty, and was fined, with the usual costs.

The A. P. P. have been instructed to prosecute any one operating a car without a license, therefore it is advisable for all operating a car without having the necessary license to be governed by the result of this case and to understand that in future the Justice will assess the fine in proportion to the amount of the license fee and the date from which it should have been obtained.

MAYVIEW NEWS

The Mayview U.F.A. met on Friday, April 13th with a good attendance. One new member signed the roll. Mr. Shaw gave a splendid paper on "What I think the U.F.A. should try to do," for which he was given a hearty vote of thanks. During the evening Mr. and Mrs. Burr were presented with a beautiful hand-painted cake plate and a silver pencil and the following address: To Mr. and Mrs. Burr, We, your fellow members of the Mayview U.F.A. local wish to express to you our appreciation for the nights of entertainment you have provided for us this past winter. You both have given so freely and so unselfishly that we feel very grateful to you. Please accept this token of our esteem. We sincerely hope you will not consider the intrinsic value as an estimation of our appreciation. We sincerely hope that you will remain with us indefinitely and we can assure you that any future service rendered for the benefit of the local will be as fully appreciated. Wishing you success and prosperity in your future ventures. Sincerely yours, Mayview local.

Mr. and Mrs. Burr thanked the local in a few well chosen words. After business there was a spelling match. Mr. Boewell was the champion and was presented with a box of delicious home-made candy which he very generously passed around. The ladies of the local served a dainty lunch after which there was dancing for a short time.

The next meeting will be May 11. It is hoped we will have some speaker from the district association at that meeting. Everybody welcome.

Mr. John O'Neil of Hardisty is assisting his uncle Mr. E. O'Neil with the spring work.

Mr. and Mrs. Burr visited with Mr. and Mrs. Stayers on Sunday.

Miss E. McCracken is visiting her aunt Mrs. O'Neil.

Miss Robinson of Harvey visited Mayview friends recently.

Sunday visitors from our district at Mrs. Mills, Berrywater, were Mr. and Mrs. E. O'Neil, Mr. J. O'Neil, Miss McCracken, Mr. and Mrs. Stein and children. Other Sunday visitors at Mrs. Mills were: Mr. D. B. Sim, Mr. and Mrs. Good and Billy McGirr.

Mr. Joe Richardson has treated himself to a brand new Ford.

BERRYWATER NEWS

On Friday evening the 13th, a whist drive and dance was held at the Berrywater school under the auspices of the Berrywater locals U. F. A. and U. F. W. A. Court whist was played, the prizes being: Gents, a sack of flour; ladies, a box of apples, with a grape fruit and a cabbage for the

Fix Up! Paint Up!

You may require a new cement walk or the erection of a fence—anything and everything that might be necessary to fix up the premises; all of which you may have without change of mechanics or the trouble of dealing with several men, we assuming the responsibility for satisfactory service in all lines. Tell us what you want, and we will tell you what it will cost.

Jos. Loisselle, Vulcan.

ITEMS OF INTEREST

The Newfoundland general elections are to be held on May 3rd.

Nova Scotia adopted the "drive-to-the-right" rule on April 15th.

Raymond's new sugar factory is to be made double the size of the previous one.

A Klan within a Klan has been discovered at Washington. It is called the Super-Klan, an inner circle made up of higher ups, such as Senators, lawyers, judges, government officers, congressmen and sagacious politicians.

To say that the Scotch race are devoid of humor is a libel on the people. It was a Scotchman who told us the other day, that "the only difference between a Banana and a Scotchman, is that you can skin the Banana."

The difficulty which farmers were passing through was not due to inadequacy of the Canadian banking system, remarked a Bank of Montreal official at Ottawa recently. It was the result of a fall in the value of farm products, for which the bank could not be blamed.

Lake shipping is expecting a big year, for at the head of the Great Lakes there is a large volume of grain waiting to be released. Latest reports indicate that 42 new vessels will be added to the fleets operating on the lakes and canals. The increase in the elevator accommodation is an evidence that the leaders in the grain trade believe that an even heavier movement of grain in the future is assured.

One hundred and forty thousand Canadian boys have been organized by the Canadian Forestry Association into a Young Canadians Forest League and will be on the alert this year to prevent forest fires in all parts of the Dominion. Badges and detailed instructions are being supplied and the entire body will act as an auxiliary force to the fire rangers when occasion offers.

The re-opening of the nickel works in Sudbury, which have been closed for several years, is a matter of considerable satisfaction, not merely because it will revive industry and provide employment for a very large number of men, but also because of what it indicates. It means the revival of business. The old world, despite the blunders of men, is slowly but surely rounding to again.

In 1922 Canada produced 2,418 tons of salt cake, valued at \$54,804; and 1,329 tons of glauber salts, valued at \$42,719, according to government figures. There are a number of immense deposits of glauber salt in Saskatchewan which at the present time, are only in the initial stages of development, but it is anticipated that the next few years will see a considerable increase in production.

Arrangements are well advanced for the opening here of the second cheese factory in the province by P. Burns and Company. All the machinery is being shipped from the east by the De Laval Company and it is anticipated that operations will commence sometime this month. The present plans call for an output of 500 pounds of cheese daily.

A contract for what is claimed to be the biggest catering proposition ever attempted in Western Canada has been signed by the Church of the Brethren and a local caterer, by which the latter contracts to provide meals and refreshments for delegates to the annual conference to be held in Calgary in June. The caterer anticipates serving 75,000 meals during the conference.

Contract for the construction of an addition to the Government elevator in Vancouver, has been awarded by the Harbor Commission to the Pacific Construction Company of Vancouver. The new wing will increase the capacity of the elevator by 808,000 bushels. The work will commence immediately.

Liverpool is making a strong bid for a share of the Canadian cattle trade. The city possesses a market capable of handling 7,000 head. It is hoped that by May if cattle arrive in large numbers a portion will be diverted to the port from Birkenhead. The harbor board is being pressed to provide additional facilities on the Liverpool side of the Mersey.

COMMUNICATION

To The Editor, Vulcan Advocate, High River Football Club has been elected to Calgary 3rd Division League and will be well filled up with engagement this summer, playing league and cup tie games, but we write this letter to Vulcan not to let this stop Vulcan from forming a Football Club, as High River have formed a 2nd eleven which will be called "High River Rangers" and are open for engagement with Vulcan, Blackie and Champion.

Mr. Luther King is the manager and secretary, but any communication addressed to Jack Miller, Harold Ives, D. McKay or Luther King will get immediate attention.

We are out to promote football in this district and by being elected to Calgary League have already made High River a community of football enthusiasts. Get your team going. Champion has a good team and by next season's we will be almost sure to have a league, and there is always a possibility of forming one, even this season, if Blackie would come in. We could have Champion, Vulcan, Blackie High River Rangers and Cayley which would make a five-team league. Calgary 3rd Division last year had only five teams, this year there are eight.

So you can see football is on the rise and if we could have a league as above suggested at once, possibly by next year we might have an eight or ten club league. Get started now, waste no time, the sooner you start, the better position you will be in to hold your own when we get that league going.

Yours for success,
JACK MILLER,
President of High River Football Club

WHY SUGAR IS DEAR

Perhaps the market for sugar is rigged. Perhaps not.

Sugar, usually went up in price during the preserving season. That advance indicated the law of supply and demand.

But every season is preserving just now. How much sugar do you suppose is consumed in the manufacture of moonshine? Well, one seizure was made near Kincardine, Ont., not long ago and there was over a ton of sugar in the "mash" found. Multiply this by the number of stills operating all over Canada, divide it by two or three or ten if you like, to strike an average of production and you may arrive at one reason why sugar is high—Kincardine Review.

The sum of \$2,700 in cash was realized at Lethbridge when a dry squad raided several places in that city on Saturday last. The province will get the entire amount.

Signor Raphael Jachetta and company of six artists will give a concert in the Opera House at Vulcan on Friday, April 27th. It will be a high class entertainment in every particular, and the program will be pleasing variety, ranging from operatic selections to ballads and popular songs, and will include dancing numbers by a duo of Calgary kiddies. It is a program of the kind that has in it something for everybody, and everything good. Offerings of this kind should receive the patronage of our particular people, for seldom has the small town the privilege of an entertainment of this class and excellence. And the admission price is moderate, 75c for adults and 25c for children.

Why Fear Child Birth

Dr. J. H. Dyer, noted child birth specialist, devoted a life to women's service. He discovered a new method of lessening the time and pain of labor, and adopted Dr. J. H. Dyer's Compound.

ATTENTION

MR. FARMER

I have recently been appointed local representative at Vulcan for the International Harvester Co., of Canada Ltd. I am now open for business in the old W. L. Bucher store opposite the old McPherson Hardware. I take this opportunity of extending to you a friendly invitation to call and examine the goods I have for sale. Also get acquainted with the new I. H. C. man who will aim to give service on both machines and repairs.

Yours truly,

R. J. Monds

Telephone 63

P. O. Box 245

Town of Vulcan

Notice of Importance

Citizens are hereby notified that the Council have decided that the town must be cleaned up by May 5th. Citizens will therefore attend to the cleaning up of their lots, etc., and render personal assistance to endeavours of the Council in this direction.

Riding on Sidewalks

The dangerous practice of riding on sidewalks by boys on bicycles was discussed at the Council meeting on the 17th inst. and the police notified to take steps for the prosecution of offenders.

No wonder babies grow up to look like their fathers. All they do is loaf around and raise a racket.

A golf ball leaves the club head at about 135 miles an hour, which is about as fast as a golfer leaves the office.

Many a man has lost his reputation for veracity by going on a fishing trip, according to Jack Woods.

House Cleaning will be the main topic of conversation and industry for the next couple of weeks, among the ladies.
